TO ENGINEERS, SURVEYORS, STREET AND ROAD CONTRACTORS, PAVIORS, AND BUILDERS.

THE GRAIGLWYD QUARRY COMPANY are now prepared to supply any quantity of square Setts of various sizes, smooth-faced Channel Stones, Kerbs and Building Stones from the Quarries, Penmaenmawr near Conway, into Trucks at their Sidings on the Chester and Holyhead Railway, free on board vessels at the shipping pier, or delivered as any such port by the Company's vessels, at most reasonable prices. This material has been used for many years in Liverpool, Manchester, Chester, Birkenhead, and other large Towns in Paving the Streets with Setts, and the rough Stones, when broken, in Macadamizing. It has been tested in all situations, and found superior to Granite, from its much greater durability, the Setts having been laid down in streets of great traffic upwards of 15 years with scarcely any perceptible wear. It has been extensively used in Welling and Archway Tunnels, &c. on the Holyhead Line, and much approved by the Engineers.—For prices and further particulars, apply to RAYNES, LUPTON, & CO., Liverpool.

Specimens of the above Stone will be at the Great Exhibition.

MARTIN'S PATENT
FIRE-PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This valuable Cement has now been before the public so many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. MESSRS. STEVENS and SON, however, feel called upon to observe, from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, where will be found a gain of 14½ per cent. in material, full 7 per cent. less in price, with an additional saving in labour of 10 per cent., by the allowing about forty minutes for working, being less than one-tenth of the time of other cements of a similar texture, therefore worked with greater facility, making together the enormous saving of full THIRTY-THREE PER CENT.; its advantages therefore cannot admit of doubt. Specimens, showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement, in any quantity, obtained of MESSRS. STEVENS and SON, at their Plaster and Cement Works, 161, Drury-lane, London.—Manufactory, Derwent Mill, Derby.

N.B. The Cement will receive paint or paper in a few hours after the completion of the work by the plasterers.

JOHNS and CO.'S
PATENT PERMANENT STUCCO WASH,
WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

JOHNS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing very advantages over the common lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other.—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One cwt. will cover 300 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and the many other important and well as external purposes, places it above all other compounds of its kind; in fact, as an external stucco, it may be painted or painted in a few days; never blisters, cracks, or vegetates, soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Testimonials, references, specimens, and every information may be obtained, on application to the sole Agent, PHILIP HAM, at the Warehouse, 21, Stanhope-street, Upper Thames-street. A liberal allowance to wholesale dealers.

ATKINSON'S CEMENT.—This Cement has been manufactured in Yorkshire, and, through [illegible] etc., has often proved safe and useful for use on [illegible]. By the arrangement now made, the Cement will be procured in London, and thus presented to consumers in [illegible] at the same price, by the sole Agents, J. B. WHITE and [illegible] Cement Wharf, Westminster.

KEENE'S and PARIAN CEMENTS, [illegible] stucco, are employed very advantageously to [illegible] for skirtings, cashframes, and panel mouldings, and for [illegible] coating, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an [illegible] substitute for stone, in cases where [illegible] and beauty of finish are essential.—J. B. WHITE and Sons, 4, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

THE PARIAN CEMENT, for INTERNAL STUCCO, which was supplied at Messrs. J. & R. BRAMLEY'S warehouse and dwelling in Wood-street, Cheapside, to the City [illegible] throughout the whole of the premises, a period of [illegible] during which time the Cement has proved perfectly successful, and has given entire satisfaction, as the walls have remained perfectly free from damp, and the [illegible] of the Cement work, which is invariably followed on the next day by the painters, thereby enabling me to have the [illegible] complete in the shortest possible time, both for business and for the occupation of the establishment. I am, therefore, of opinion that the use of Old new material is a most valuable [illegible] in building operations, and fully justifies that which I was given to understand, viz., that it was an extraordinary material. I think it right to mention that I used at the present time having a cement of similar work executed at another range of buildings, where the [illegible] and the quality of the work are of the utmost importance.

(Signed) JNO. WALLEN, Architect, London.

To Messrs. Chas. Freestly and Sons, Manufacturers, Nine Elms.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco, it does not vegetate or turn green in damp situations, and requires no coloring. Employed as an hydraulic mortar for brickwork, it requires four to five measures of sand to one of cement, and in practice to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior resisting power, combined with its confessedly hydraulic property, must point it out as the fittest material for building sea and embankment walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water is required.

Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 26, Seel-street, Liverpool.

PORTLAND CEMENT, as manufactured by WILLIAM ASPDIN, the Patentee.—Messrs. ROBINS, ASPDIN, and Co. refer to No. 296, page 491; and also Nos. 294 and 295, page 343 and 351, of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has proved for upwards of twenty years in the Thames, how to resist the action of water; it is stronger in its cementing qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystalize, or burn green; nor is it affected by any atmospheric influences whatever the climate, resisting alike the action of frost and heat. It is manufactured to set from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Mineral Iron Wharf, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall, also at their Depôt, 56, Hanover-street, Liverpool.

PORTLAND CEMENT.—FREEMAN and RICHARDSON have much pleasure in introducing to the trade the above superior CEMENT, being of uniform color and quality as decidedly as never before attained in Portland Cements. It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack, combining with which its eminent hydraulic properties changes it at once into the first Cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by J. GREAVES, Esq., at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

4, South Wharf, Paddington.

GREAVES'S PORTLAND, ROMAN, and LIAS CEMENTS.—The above possess every cementitious property, in an eminent degree, and are unequalled for all hydraulic purposes.

GREAVES'S GROUND BLUE LIAS LIME.
FREEMAN and RICHARDSON, Agents.
Office, Warwick. 4, South Wharf, Paddington.

BELL'S PATENT LIQUID CEMENT.—Ready for use, on the front of houses, only one-eighth the cost of oil paint, for beauty it is unequalled, it fills the appearance of fine cut stone. In casks of 1, 2, and 3 cwt., at 5s. per lb. and 6½ cask. Casks returnable.

PATENT MINERAL PAINT, invaluable for cheapness, [illegible] and permanence. Ready for use. Will stand any climate, and [illegible] colouring for any article.

NEW ELASTIC PAINT for DAMP WALLS; an effectual remedy, inside or out. Will dry in a few hours, and may be papered over at once, if desired.—G. BELL and Co., Steam Mills, [illegible] lington-street, Goswell-street.

DAMP WALLS.—New PATENT PAINT a guaranteed remedy, will dry in a few hours, and may be immediately papered over.—G. BELL and CO., steam mills, [illegible] lington-street, Gosswell-street.

PATENT WHITE ZINC PAINT.—JOHN WARNER and SONS are prepared to supply this paint to builders, painters, and plumbers, on [illegible] terms. It is free from all poisonous qualities; it is unaffected by sea-water, sulphuretted hydrogen, or any of the gases; and possesses its original colour where white lead paint will not.—Pamphlets to be had at J. Warner and Sons', 8, Cresent, Jewin-st., London.

HUBBUCK'S PATENT WHITE ZINC PAINT.—ANNOUNCEMENT.

For MARINE USES, it possesses the following advantages:—It is whiter than any other Paint, and retains this whiteness for years unaffected by brine-water, or noxious vapours from cargo. The White Paint in the hold of a ship, after discharging a cargo, is found to be as white as the year before when first painted. Under these and other circumstances, where every other paint hitherto known and tried has failed, the "White Zinc Paint" has preserved the freshness of its colour. Moreover, by virtue of its galvanic action on iron, it enters the pores, and forms a combination of the two metals, which prevents the iron from rusting, or spontaneous decay.

For the GENERAL PURPOSES of the decorative painter, the "White Zinc Paint" has been found unparalleled in whiteness, clearness of colour, durability, and fineness of texture. It becomes hard as to admit of polishing equal to the finest enamel painting.

For SANITARY PURPOSES the "White Zinc Paint" is invaluable, not only from its being totally free from every ingredient injurious to health, but from its combining chemical qualities which render it a powerful corrective where contagious diseases have prevailed; furniture or buildings painted with it are at once purified. Paralytic and Pulmonary Cases have been treated by means as well as similar results to the occupants of newly painted rooms. Apartments may be immediately occupied, without injury to the health of children or the most delicate constitution. It becomes cheaper than common paint, from its spreading over a much larger surface, 3 cwt. of this paint covering as much as 5 usually covered by 2 cwt. of white lead. Fresh coat is accomplished with the same [illegible] Hubbuck.—London.—Patent," on the style of the manufacturers. A circular with full particulars may be had of the manufacturers, THOMAS HUBBUCK and SONS, Colour Works, opposite the London Dock.
